

TEAM OPERATIONS / AI ASSISTANCE

TeamPresence

A clearer view of your team's day.

Connect attendance, leave requests and approvals in one place. AI uses the team's actual data to answer questions and help people act.

IN PRODUCTION

Built for employees, managers and HR. Already used by an IT integrator.

01 One shared view of team availability

Daily attendance, absence requests, calendars and personal history give employees and managers a consistent picture.

02 Assistance grounded in permitted data

The assistant checks the user's access rights, summarises the situation and prepares forms or action proposals.

03 Confirmation before changes

Users preview and confirm actions in the web assistant. The application applies authorisation rules and records the operation in its audit trail.

HOW IT WORKS**01 Ask a question****02 Check team data****03 Review the proposal****04 Confirm the action**

Show us how your team works.

Explore attendance and approval workflows, AI assistance and deployment for your organisation.
